

Exochique High Gloss Vanity Finish Care and Maintenance

Dear Customer

Thank you for choosing the Exochique high gloss finish for your vanity. Exochique is manufactured from specialised materials to achieve a mirror like finish. To maintain the finish it is very important to use the correct cleaning products and follow the recommended instructions

Cleaning Recommendations

- Only clean the Exochique high gloss surface with a mild detergent.
- Only use a soft cloth such as a “Microfibre cloth or a chamois” to wipe the surface down.
- Always ensure the cloth is damp before using.
- Ensure to rinse any contaminants from the cleaning cloth after each wipe
- Clean up any spillages immediately. Be careful of wiping down spillages that may contain abrasive ingredients e.g. toothpaste.
- When wiping down only apply light pressure.
- At the end of the cleaning session– thoroughly wash and rinse the cleaning cloth ready for next time. (This avoids the risk of abrasive contaminants being left in the cloth).

Caution

Do Not

- Under no circumstance use solvent based cleaners – these may damage the surface and cause the surface to become dull.
- Do not use abrasive cleaners.
- Do not use coarse cleaning cloths or dry paper towels.
- Do not scrape the surface.
- Do not use excessive pressure or heavy circular motions– this may leave swirl marks.
- Do not expose to high temperatures.
